KASIREDDY NARAYANA REDDY COLLEGE OF ENGINEERING AND RESEARCH
BTech - 8.5

SKILLS

- Basic python skills
- Decision making
- C language
- HTML basics

PROJECTS

Ai health care Chatbot System using Natural language process

AI Healthcare Chatbot System using NLP

Developed an intelligent chatbot capable of understanding and responding to patient queries using natural language processing. Integrated medical databases to provide symptom-based responses, appointment scheduling, and health guidance. Focused on improving patient engagement, reducing workload on healthcare staff, and ensuring data privacy and compliance with healthcare standards

Rock paper Scissors game

Developed a command-line based Rock- Paper-Scissors game using Python, demonstrating core programming concepts such as control flow, user input handling, and randomization.

Implemented game logic with conditional statements and utilized the random module to simulate computer choices.

Enhanced user experience with input validation and clear win/loss feedback.
